

Missouri S&T Launches New Bachelor of Science in Biochemistry

Interested in discovering how life works at the molecular level, and using that knowledge to improve medicine, biotechnology, and human health?

Missouri S&T Bachelor of Science in Biochemistry offers a pathway to do exactly that with a **Bachelor of Science in Biochemistry!**

A degree in biochemistry is the right fit for students who enjoy chemistry, biology, and solving complex problems. It can open doors to careers in medicine, biotechnology, pharmaceuticals, research, as well as graduate and professional schools. Biochemistry explores the chemical processes that drive life, from how enzymes catalyze reactions to how cells communicate, adapt, and respond to their environment. At Missouri S&T, students receive a strong foundation in chemistry, biology, and mathematics while gaining hands-on research experience with faculty who are actively advancing scientific discovery.

Wonder how you can apply?

Visit the B.S. in Biochemistry program webpage at go.mst.edu/biochem to explore the curriculum, career pathways, and application information. Questions may also be directed to Dr. Pablo Sobrado, director of the biochemistry program, at psobrado@mst.edu or 573-341-4768.

A promotional poster for the Missouri S&T Biochemistry Program. The poster has a dark green background with a lighter green border. At the top left is a QR code. To its right is the Missouri S&T logo, and further right is the text "Biochemistry Program" and "Chemistry Department". Below the logo is a photograph of two students in a lab setting, one wearing safety goggles and holding a flask. Below the photo is a white button with the text "APPLY TODAY". At the bottom, the text "NEW BACHELOR'S DEGREE IN BIOCHEMISTRY" is written in large, bold, yellow-green letters. Below that, in white text, is the phrase "Biology. Chemistry. Medicine. One degree where they all meet."
