Abstract: The scientific landscape relies on effective communication of intricate ideas in writing. Navigating this process can be tough, but the S&T Writing Center is here to guide students through its stages. This presentation offers an overview of services aiding skill development in formal writing, resumes, and poster presentations. It also covers diverse outlets for sharing scientific findings, including academic journals, conferences, and trade journals. The discussion extends to how to find and apply for fellowships to pay for graduate school and future research. Ultimately, this empowers chemistry students to excel in academic writing and future professional pursuits. Through Writing Center resources and fellowships, students can adeptly showcase expertise, securing success in post-graduate journeys.

About the speaker: Dr. Wes Lewis currently serves as the Assistant Vice Provost for Undergraduate Education and Interim Director for the Writing Center. He received his Ed.D. in Higher Education from the University of Central Florida. Before S&T, he worked at Embry-Riddle Aeronautical University for the past decade in various capacities, including undergraduate research. Dr. Wes has a passion for education, leadership, and helping students make the most out of their educational opportunities. His research interest includes the retention of students through experiential learning opportunities, higher education finance, and educational systems.
